

The most universal permanent replacement run capacitor on the market!

SIGMA CAP

- Replaces hundreds of different capacitor sizes—both singles and duals.
- All units are dual-rated for 370/440 VAC.
- Simple to use and reduces truck stock, which saves time and trips to the parts house.
- You can finish the service job in just one trip since you'll always have the right size capacitor!
- Each pod can be used as a standalone unit or stacked to get the right MFD value needed.
- Permanent fix—no reason to return to the job!
- Sigma Cap Pro™ holds a US Patent and is proudly made in the USA with global components.
- Individual pods are available, so you can adjust stock for your most common builds.
- Easy to use—rotate and stack the pods to add capacitance on the correct side and build the dual capacitor needed.
- Add up the numbers along the side to confirm the MFD rating.

For Sigma Cap Kit, Order SCKIT | Individual Replacement Pods Available

Pkg Qty	Single Unit	Part Number	Body Height (in)	Term Height (in)	Total Height (in)	Diameter (in)
1	25/5 MFD	SC255	2.63	0.531	3.161	2.5
